Data Capture Specialists

Newsletter

January 2012

It is rather late to be wishing everyone a Happy New Year but we would like to think that 2012 will be a good year for you whatever it may bring. 2011 for many people was a "wait and see" year with so projects delayed or cancelled but in business we cannot stand still. Make 2012 the year of change, there are many ways to streamline processes so that you can cope with setbacks such as loss of manpower or cuts in budget. Central Peripherals is here to help and advise you on all aspects of data capture to ensure that your company continues to grow and remains profitable.

Upgrade to Intermec CK71 and Claim a Rebate

Intermec are offering a rebate of around £190, between now and 30th of June for every CK71 purchased to replace legacy products such as:

Intermec CK31; CK61
Dolphin 7400/7450
Psion Workabout Pro 7527; 7535
Datalogic Kyman; Viper-DL9600

Honeywell 9550; 9950
Motorola MC9090G; 6800
LXE MX7; MX6

and if you purchase the 3 year hardware support there is a further rebate due.

Features

- 31% smaller and lighter than leading devices in the ultra rugged class
- Industry's fastest and farthest imaging engines delivering superior motion tolerance and barcode read range
- Exceptional peripheral support and quick change snap-on accessories provide versatility for every distribution environment
- On-board diagnostics and INcontrol Managed Services provide device health visibility
- Advanced power and battery management technologies extend device run time and reduce expense of replacement batteries
- Dual-band 802.11n radio for pervasive wireless coverage

When workload demands shift unexpectedly, the CK71 gives you the flexibility to redeploy staff without consideration to the tools needed to get the job done. With the industry's first dual-band 802.11n WLAN radio, the CK71 delivers rock solid performance and consistently fast response times, even in areas where you might experience low signal levels or intermittent connections with traditional 802.11a/b/g products.

The CK71 utilises Intermec's industry-leading near/far area imager, capable of scanning from 15.2 cm up to 15.2 m (6 in up to 50 ft) allowing you the flexibility to read both 1D and 2D bar codes without the need for specialised scanners. For highly dynamic environments, the CK71 also offers Intermec's latest achievement: the industry's fastest imaging engine, capable of scanning bar codes moving at up to 12.7 m (500 in) per second, enabling the CK71 to provide remarkable tolerance to hand or bar code movement.

So if you are considering upgrading your existing scanners be sure you look at Intermec between now and the 30th of June to take advantage of this great offer.

Price Reductions Extended on Zebra 28xx Printers

Zebra have announced that the price reductions on the 28xx LP and TLP series of label printers will continue into 2012. Although not as robust as the newer G series of printers they are great value and ideal for lower volume jobs.

Configurations include peel and cutter options but exclude the ethernet interface option.

Zebra have a wide range of off-the-shelf labels and ribbons available to suit most needs.

Business Durable Tablet from Motorola

The ET 1 tablet from Motorola is available now. The ET-1 combines the sleek design and user-friendly experience of a tablet with the brain-power, durability and lifecycle of a device truly built for business. The ET1 Enterprise Tablet doesn't compromise what you rely on most, like security, durability and flexibility. It's designed to be fit for purpose – to make your enterprise ready for whatever the future holds and whatever your customers demand.

Features:

- 7" display with extra tough glass
- Capacitive multi-touch screen
- Keypad: virtual; Bluetooth
- OS: Android 2.3.4 with enhanced functionality
- Memory: 1GB Ram 4GB flash, plus 4GB micro SD
- Micro SD card slot supports up to 32GB
- Rear and Front cameras
- 720p video

Consumer styling with real business durability.

On the outside, the ET 1 is every bit as elegant as today's most popular tablets. Yet the ET 1 is built for everyday use, able to handle drops, spills, chilly winter temperatures, extreme heat and more. And since the display is built with ultra-strong Gorilla® Glass, it is virtually impervious to damage, able to flex when dropped without shattering or scratching.

Whether your data resides on the internal drive or on removable media, it is encrypted and safe from hackers. So you can easily secure sensitive information to help comply with industry and government regulations.

Built for multiple users with feature-level control.

No matter how many workers use a device throughout the day, with multi-user log-on, each worker is automatically granted access to their own personalised workspace — the right applications and device features. And since managers know who is using the device at any time, task management is easier. Add the features you need — when you need them. With an expansion port and Bluetooth, you can add peripherals to meet changing business needs, from scanners for easy inventory takes to magnetic stripe readers for payment processing.

Work uninterrupted — power up and stay up.

While most tablets in the industry only offer rechargeable batteries, the ET 1 adds a removable battery that users can swap, preventing loss of data — and productivity.

Easily build applications that run on the ET 1—and your other Motorola mobile computers

The more operating systems you have, the more complex and expensive application development and maintenance can be. But with Motorola's RhoElements, you can easily create a single application that looks, feels and acts the same on Motorola mobile computers, regardless of whether it is built on the Android, Microsoft Windows Mobile or Windows CE operating system. Since you no longer need to create and maintain separate applications for each operating system, you can choose the right device for each worker — without increasing application development and support costs.

Easily manage your devices — from anywhere.

Whether you have one location or locations all around the world, Motorola's Mobility Services Platform (MSP) allows you to remotely stage, update, monitor and troubleshoot your Motorola mobile computers, driving the single largest mobility cost to an all-time low — everyday management.

Protect your investment from the unexpected.

Unexpected repair costs can substantially increase the cost of your mobility solution. But with Service from the Start with Comprehensive Coverage, you get true business-class support for your tablet. This all-inclusive service covers normal wear and tear and internal and external components damaged through accidental breakage — keeping the ET 1 up, running and in the hands of your users.

Motorola Trade-In Deal on PDAs

To kick start the New Year Motorola have announced a new Trade In Program.

Buy a new MC55A0 or MC75A0 and trade in any old mobile computer and get a rebate of around £130. ANY brand and ANY model of mobile computer can be traded in for a rebate – all it needs to have is a 3 inch to 4 inch diagonal screen size .

Call us for more information on the MC55A0 and MC75A0. Now is an ideal time to review your legacy PDAs and upgrade for the new year.

MC55A0
